#### OVERVIEW ▾

The ideal cage for tight frame designs and BTA mounts. The cage body can be flipped for either right side or left side removal.

#### Easy load design for compact frames

- Side-loader design makes this cage ideal for small frames that leave little room for removing bottles in the typical forward and up motion. Suitable for both road and mountain use.

#### BTA Mount Optimized

- The cage is optimized for BTA (between the arms) bottle mounts where the natural motion is to pull the bottle sideways.
