Designed and engineered in-house utilizing the ultimate in cycling GPS technology, the Mega XL GPS is a must have device for serious riders. It has a large, 2.7-inch 240x400 high-resolution screen with the option of vertical or horizontal viewing. It can simultaneously pair with Bluetooth Smart or ANT+™ enabled power meters, heart rate monitors, and speed/cadence sensors, as well as compatible electronic drivetrains. When paired with an iOS or Android handheld through the free Lezyne Ally V2 app, the device provides live turn-by-turn navigation and phone notifications (incoming calls, texts and message app notifications). It also provides offline navigation and can be instantly customized.

Live tracking (Lezyne Track) can be activated in the app to let friends and family follow rides in real-time. Furthermore, the device is equipped with GPS/GLONASS, a barometer, and an accelerometer. Combined, these greatly improve accuracy and data recording.

The Mega XL GPS is known for its best-in-class battery runtime of up to 48 hours.

Loaded options/kits available.

05.12.2021 - The best cycling computers of 2022: Best bike computer for long adventures - Wiggle

"The Lezyne Mega XL GPS Cycle Computer can run for an impressive 48 hours off a single charge and can store up to 800 hours of data, making it a perfect choice for your bike-packing adventures and audax rides."

9.20.2019 - 11 best GPS cycling computers so you can train smarter - The Independent

Awesome battery life is the big selling point for this one. It claims up to a whopping 48 hours thanks to its use of a 2.7-inch black and white screen rather than a power-sapping colour one. It will pair with your phone and ANT+ sensors and you can customise the array of data fields you see on-screen. Unusually, this solid little unit can be mounted in either portrait or landscape format. It feels solid enough to stand a few bumps and knocks, making it a good choice if you enjoy riding trails.

**5.29.2019 - Alison Tetric Q&A: Mental prep for Dirty Kanza - Velonews**

"A lot of these races, the courses aren't marked. That makes it fun and a little bit of an adventure. Kanza's not marked. So, I use this Lezyne GPS; you download the map, you get the turn by turn, and you follow the breadcrumbs along the course and hope you don't get lost in the Flint Hills." - Alison Tetric

**11.15.2018 - MEGA XL GPS Review - Outdoor Gear Lab**

**TOP PICK** - The Mega XL has the distinction of being the newest, biggest, and best model in Lezyne's range of GPS enabled cycling computers...It's got too many features to mention, but it earns high marks for its smartphone integration through the well designed and user-friendly Ally V2 App, and its compatibility with both ANT+ and Bluetooth Smart sensors. It also has a live tracking feature and does Strava Live segments and structured workouts when synced with your favorite apps. It has all the navigation features you'd expect, plus the addition of easily uploadable offline maps for navigating when you lose service. It is also impressively customizable with the ability to create up to five different bike profiles and five data pages that can display up to 10 data fields at once. The Mega XL is also offered a very competitive an reasonable price.
