

CF

CROSSMARK II

XC (CROSS COUNTRY)

The Crossmark II improves on the speed of its predecessor while improving grip in intermediate conditions. The legendary center ridge still flies on hard pack, and the updated tread pattern provides better braking and cornering over a wide range of trail conditions. A great choice if you want to go fast everywhere.

- Designed for speed, revised for control
- Open-side knob design for versatile cornering
- Tightly packed center knobs for speed over hard pack

- TUBELESS READY

TUBELESS READY

Tubeless ready tires provide the rider with many benefits: the ability to run lower air pressures, which improves traction; lower rolling resistance when compared to a tube-type tire; and less chance of flattening because there is no tube. Tubeless ready tires are denoted by the letters "TR" on the sidewall. Tubeless ready tires must be mounted to tubeless compatible rims and require the use of a liquid sealant to maintain pressure. Liquid sealants have the added benefit of sealing small punctures. Be sure to check your sealant regularly and refresh as needed as it will dry out over time. Liquid sealants should only be used in the following types of tires: tubeless road, tubular, and tubeless ready. The use of liquid sealants in any other Maxxis tire will void the warranty.

Great XC Tire
I only needed one tire because I punctured my rear tire. I'm running a 27.5x2.20 Ikon tire up front and the 27.5x2.25 Crossmark II in the rear. Traction has greatly improved with this new tire, especially compared to the Ikon. Ikon feels slightly faster rolling, but the tradeoff for extra grip is well worth it in my opinion.

Quality Performance Value

Nice compromise between a trail and XC tire
Mounted on a 26 mm (internal) wide rim, the tire has nice shape. Rolls well, not fast like an Ikon, but still good. At 22-25 psi they soften a rooted ride. No issues going tubeless; inflates easily...
