## AVAILABLE TECHNOLOGIES

**MAXXSPEED**

The new **MaxxSpeed (2023)** is our top-shelf rubber compound for XC racing. It's a high-silica content compound which reduces rolling resistance while also enhancing wet traction. Compared to the previous 3C MaxxSpeed, the new compound has approximately 25% less rolling resistance in a lab setting (using the same tread pattern, construction, and tire pressure). In a real world setting, our testing shows the new compound can save up to a minute over the course of a 90-minute race.

**Great tire**  
 Great tire exactly what I was looking for. Looks great! Fast rolling grippy tire when used for the correct conditions. Very versatile tire. Very happy with my purchase. Brought an old hard tail back to life.  
 Location: Lawrenceburg, Indiana
